

### Med History Screen Update

Name of button on Old Screen	Name of button on New Screen
<b>How function works or if no change</b>	
Add Medicine	New
No change, this will add a new medication to the med history	
New Drug Interactions	High Alert Interaction
Looks for high interaction medications using MedLine Plus. This <b>requires internet connection</b> to preview.	
New Drug Interactions	*All Interactions
Check this box then click on the High Alert Interaction button to look for all interactions using MedLine Plus. <b>This requires internet connection</b> to preview.	
	Med Info
Pulls up the Medline Plus Drug information sheet on the selected medication. This is pulled from the Medline web page and <b>requires internet connection</b> to preview.	
Add New Dose/Freq/Route	Add
Adds a new entry for the selected medication. Use this when you need to update the medication dose or frequency from a new order.	
Edit Incorrect Entry	Edit
Select the medication and then the entry on the right side to modify the existing information.	
	Stop
New button on the main screen. It is the same as the Discontinue option on the Add or Edit screen. It will use today's date and automatically mark the medication as stopped with the current date. If you need to select a different date you will use the Add button from the right pane.	
Print Med Sheets	Med Sheets
The interaction options no longer show up on this screen. You will use the All Interactions option on the main Med History screen.	
Show All Meds / Show Current Meds	Viewing (with drop down list)
Select the current medication or all to include the discontinued, as well.	
Comfort Kits	Comfort Kits
No changes here. This will pull up the comfort kit screen.	
Check for Duplicated or Unknown Meds	Validate Meds
Works the same as before, the button was renamed.	
Update Pharmacy	Green Icon in the bottom, right corner
Update the patient's pharmacy information.
