

Put a HCPCS Code on a UB04

HCPCS (or Procedure) Codes come from the Job Code, which are setup under Barnestorm Office > **Codes > Rates > Job Codes**. Each discipline has their own job code setup, including the HCPCS as needed. Some have multiple codes setup for different payer requirements. If you create a claim and the correct HCPCS code does not show up, verify the correct code is setup in this screen.

Also check **Codes > Program Related Codes > Payer Codes**. Pull up that payer and check to see how the question "Use Medicare HCPCS" is answered. If it is answered, Yes, the HCPCS on the Job Code will be ignored and will be replaced with G codes instead (based on the Rev Code used on the Job Code).

Rev Code =	G code
042X =	G0151 PT
042X =	G0157 PT Assistant
043X =	G0152 OT
043X =	G0158 OT Assistant
044X =	G0153 ST
055X =	G0154 RN
056X =	G0155 MSW
057X =	G0156 HHA
