# How Saving Works on the Referral Screen

When you move from one tab to another, Barnestorm automatically saves the information entered on the previous tab. Simply navigating between tabs will save your changes.

If you enter information and plan to close the screen without clicking another tab, you must click Save All Patient Data to save your work.

## Ways to Save

- Click another tab

- Click Save All Patient Data

> **Note**: When adding or editing a payer, you must click Save Payer to save those changes.
