

## **Create Verbal Order Video:** [Verbal Order - YouTube](#)

This video looks outdated, for most features they are still the same process.

## **Using the Order Builder Video:** [New Barnestorm Order Builder - YouTube](#)

- Select the patient from the **Select Patient** screen.
- Go to Orders > **Add / Edit Orders**, from Point of Care select the Orders screen.
- Change the Order Date as needed. **\*Note:** Each agency defines the max number of days an order can be backdated and future dates.
- The default doctor and employee will already be filled in. Change them as needed.
- Select the type of order from the **Type** dropdown list, as needed. As soon as you select a **Type** a time and date stamp will be inserted to the top of the screen. This can be deleted, as needed. Some items listed here will automatically pull up the **Customize order content** window. See full article details [here](#).
- In the large text box on the top half of the screen, type in the orders.
- **Left Message / Received Order** - You can date and time stamp the order by clicking these buttons. The current date and time will be inserted along with text for 'Left a message' and 'Order received'.
- **[T]ext Item Box** - This button allows you to see orders that your agency has entered as standard orders, and to select them rather than having to type frequently used orders.
- Click the **Save as Pending Order** button in the upper right. Notice that when you click the **Save** button, the order goes into the lower left panel, which is labelled **Pending Orders**.
- Click on the new order in the **Pending Orders** panel.
- Create VO or FYI 1) Click the **Create Order** if this is a standard verbal order requiring a signature from the nurse and ordering physician. Or 2) Click the **Create VO (FYI)** button to create an informational order. This indicates that this information does not require a signed order, but it needs to be documented and sent to the physician.
- A window will open with the print preview of the verbal order.
- To print this page, click the **Print** button in the upper left.
- **IMPORTANT:** Once you print this document, you will need to mail or fax it to the doctor.

## Create Verbal Orders / Informational Orders

- Close the print window. When you close the print window, you will see that the verbal order has now moved to the right panel, labelled **Show Verbal Orders During the Past 125 Days**. Orders on this side should be those that have been mailed.

The screenshot shows a software interface for creating and viewing verbal orders. At the top, there is a large text area with a red instruction: "You begin here by entering the order information and clicking on the Save as Pending Order button." Below this are buttons for "Save as Pending Order" and "Cancel".

The interface is divided into two main sections:

- Pending Orders:** This section includes a "Create Order" button, a "Show Orders - VO Not Needed" button, and a list of actions: "Preview Orders", "Create VO (FYI)", "No VO Needed", "Edit Order", "Delete Order", "Previous", and "Next". Below these are date pickers for "From: 12/25/2011" and "Thru: 2/22/2012", and a field for "Applies to Visits Starting: 9/27/2012". A red instruction reads: "Once you save the information from above, the pending order shows here. These orders are still pending. A verbal order has not been created yet."
- View Verbal Orders from the Past 125 Days:** This section shows "Empl# 0114" and a "Show All" button. It contains a table of orders:

Order #	Issued	Dr#	Type	
011400579	06-15-12	0612		This is another test verbal or
011400580	06-14-12	0612		The patient needs a med change

Below the table is a red instruction: "Orders that show up here have been turned into a verbal order or an information order and has a number assigned to it." At the bottom right of this section are buttons for "Preview", "Edit", "Copy", "Delete", and "Exit".

**NOTE:** For information on how your agency can track these Informational/FYI Orders, please view the following article: [Tracking Informational/FYI Orders](#).
