Tracking Hospice Cap

You may use the **Acuity** field on the first screen of the **Referral** page to track a patient's hospice cap status.

The list below shows what the codes in the Acuity field indicate--fill them in as appriate for each patient.

1 - counts toward cap

2 - count as partial (patient stopped and then came back to hospice)

3 - used 180 days, but will take as a patient anyway

The cap is 180 days of per-diem payments, given per agency.

Once you have completed the acuity field indicators for each hospice patient, you may use the following report: **Reports (New) > Hospice > 19.05 Hospice Medicare CAP.**
