

McBee Report for Excel

McBee Associates looks for LUPA claims (< 5 visits) that had visits added after they were billed, so the claim should have had 5+ visits; and they look for therapy count discrepancies between what was billed and the actual number of visits on file now.

Barnestorm is not familiar with McBee's contract, process, requirements, or documents. Please contact McBee for answers to those questions.

Barnestorm report for McBee, export to Excel:

```
select pps.patname, pat.birthdate, pay.description, ppr.hic,
