How to save a signature with the proper size

If your signature inside of **My Signature** is large but your signed documentation shows up tiny, try the following:

o Click on **My Signature**

o Resign your signature with a shorter height, try to only use half the space height wise. The higher the text, the smaller the signature will appear.

o Click on **Save** or **Clear** and try again

o View your signature on a document

Here is an example of a good size
