Barnestorm **DOES NOT** support the installation or use of PPS Plus, nor any other Oasis audit tool.

However, in order to use these tools, the export folder from Barnestorm will have to be located. To locate the folder used for OASIS exports: Admin - Export OASIS - Set Up OASIS Agency data - it's the path listed at the bottom of the screen in the dark yellow box - click Exit to leave the screen.

For questions regarding installation or use of any Oasis audit tool, please contact the software vendor.
