

Deactivate a Job Code

If there are job codes that you no longer want to be used to key in visits or create visits in **POC**, you may deactivate them. Keep in mind that you may not delete job codes that have been used for visits or billing purposes. But, deactivating prevents their further use in the **POC** system.

- a. In Barnestorm Office, go to **Codes>Rates>Job Codes**
- b. Pull up the job code you wish to deactivate.
- c. In the Description, add these letters: **DNU**

For example, if the Job Code description was “Skilled Nursing”, it would now be “Skilled Nursing DNU”.

The screenshot shows the 'Job Codes' and 'Rates' management interface. The 'Job Codes' section is active, showing details for Job Code 001 under Program 01 (HOME HEALTH). The description is 'SKILLED NURSING DNU'. The 'Rates' section shows a table of rates with columns for Date and Rate. The current rate is 117.00 for 9/1/2008.

You can add rates with an effective date to change the visit charges for visits after that date. New rates apply to visit dates, not keying dates. Add a special first hour rate if it applies.
