

Add Vital Signs Parameters in Barnestorm Office

To add vital signs parameters for one patient in Barnestorm Office, follow these steps:

1. Select the patient.
2. Click the **Referral** button on the main menu.
3. Click the **Directives** tab.
4. Note the **Physical Parameters for notify physician**, near the middle of the screen.
5. You can use the **Fill Defaults** button to pull the agency defaults in

OR

You can fill in just the parameters that the physician has specified and leave the others blank.

6. Click the **Save All Patient Data** button in the lower left.

To add vital signs parameters with an order, you'll need to create a vital signs order.

1. Select a patient.
2. Click the **Orders** button and select **Add / Edit Orders**.
3. Select the order Type: **Parameters for notifying MD**.
4. This pulls up the full listings for vital signs. You only need to specify the ones that have been ordered; the others may be left blank. **A)** Type in the numbers in for the vitals that have been ordered. Or **B)** Click on **Fill Defaults** to use your agencies default values.
5. When you've completed the vitals parameters, click the **Insert into Order** button in the upper right.
6. The vital parameters will be inserted into the order text. You may add text as needed.
7. Click the **Save as Pending Order** button.
8. If the order needs to go to the doctor for signature, click the **Create Order** button in the lower left. If it is an internal order that does not require the doctor's signature, click **No VO Needed** instead.
9. The order preview will appear. You've completed the vital sign order now.
