

Invalid Medicine Name: Medicine Not Found in Database

The medication is in the database, but “errors” when I try to discontinue it or make changes.

1. Select the patient
2. Select **Patient Histories** tab
3. Select Med History tab
4. Click on the medication
5. Select **Edit Incorrect Entry** tab
6. On the right, under “Fix Med Name.” (*This only appears if the medication is not in the database.*), enter the correct name (or first 3 letters) into the white area, and options will appear.

Invalid Medicine Name: Medicine Not Found in Database

The screenshot shows the 'Add / Edit Medicine' form. At the top, the 'Search for Medicine' section is active, with 'CLINDAMYCIN PHOSPHATE' entered in the search field. Below this, there are fields for 'Effective Date' (7/12/2013), 'New / Change' (N/C buttons), and 'Add multiple dose/freq changes today' (checkbox). The 'Employee' field shows '0050' and 'Last Name, First Name'. The 'Doctor' field shows '0808' and 'Dr. Who Isit'. A 'Show/ Hide Med Builder' button is checked. The 'Med Builder - Structured Dose / Frequency / Route' section is visible, with fields for 'Dosage' (mg, ml, meq, gm, %, cc, units, mcg, i.u.), 'Form of Delivery' (tab, puff, spray, lozenge, cap, drop, patch, ounce), 'Frequency' (qd, qod, bid, tid, qid, prn, q 4 hrs), 'When' (hs, ac, pc, prn), 'Route' (po, otic, sublingual, per PEG, subq, per NG Tube, im, per nebulizer, IV, per G-Tube, topical, left eye), and 'Special Instructions' (do not crush, take with food, take on empty stomach, take 1 hr ac, for:). A list of suggestions is shown on the right, including 'BENZAFLIN GEL', 'CLINDAMYCIN', 'CLINDAMYCIN (TOPICAL)', 'CLINDAMYCIN TOPICAL', 'CLINDEX', 'CLINIGEN LA', 'CLINIMAX', 'CLINIMAX E', 'CLINIMIX', 'CLINISOL', 'CLINORIL', 'CLINOXIDE', 'DEMECLOCYCLINE HCL', 'DOXYCYCLINE', 'DOXYCYCLINE HYDROCHLORIDE', 'EVOCLIN', 'MINOCYCLINE', 'TETRACYCLINE', 'TETRACYCLINE HCL', 'TIGECYCLINE', and 'VARENICLINE'. The 'Save and Exit' button is highlighted in yellow.

7. Click on the correct spelling of the medication. (As you can see "Clindamycin Phosphate" is not included in the list.) The medicine name should now appear in the white area.
8. Click Fix
9. If needed, uncheck the **Show / Hide Med Builder** button to make the dose/freq show up.
10. Click **Save and Exit**

If the patient has a new medication, and it is not listed in the Barnestorm system, you can send a Med Request to have it added to the system. Use this article for help: [Request a Medication](#)

TIP: To find Active Patients with medications that are no longer valid, please view this article link: [07.04 Medication Changes](#)
