The medication is in the database, but "errors" when I try to discontinue it or make changes.

- 1. Select the patient
- 2. Select Patient Histories tab
- 3. Select Med History tab
- 4. Click on the medication
- 5. Select Edit Incorrect Entry tab

6. On the right, under "Fix Med Name." (*This only appears if the medication is not in the database.*), *e*nter the correct name (or first 3 letters) into the white area, and options will appear.
