

Copy Wound Measurements from the most Recent Visit

You have two options to copy wound measurements from visit to visit:

1) Use a Global Setting to automatically copy the wound measurements forward:

- Go to **Codes > Security > Global Settings > POC > 0736: Copy Wound Measurements from the most recent visit.**
- Change the right column to True.

When each clinician syncs, she will see the most recent wound measurements in all of her visits from that point forward.

2) As needed, select the "**Copy Most Recent Measurements**" button to copy the measurements for you.

Wound measurement guideline link that is also on the **Wound Assess** screen for the clinician to access if they have internet: <http://woundcareadvisor.com/measuring-wounds/>
