

New Clinician Comprehensive Training

The list below shows all training items required for new clinicians to learn how to use Barnestorm.

This training allows the clinician to pause the video, try it on her own, and then resume or rewind the video as needed.

Attached is a worksheet to guide you through the training. Use it to see if you need additional training in the different areas.

Comprehensive Training

Important: For RNs and clinicians who **do not perform OASIS** visits, please use [New Clinician Basic Training](#) instead of Comprehensive Training.
