If you utilize Barnestorm Point of Care, we recommend you ALWAYS build the OASIS from your Visit/Assessment. This eliminates duplicate data entry and ensures that the information matches on the visit/assessment and the OASIS.

To track those OASIS that were not created from an Assessment, go to **Reports > OASIS > 13.52 OASIS Not Created From Assessment**. This report pulls up all OASIS that 1) were created using the OASIS tab from the Main Menu OR 2) the OASIS was not created at all.
