48.01 485s Not Created From Assessment

If you utilize Barnestorm Point of Care, we recommend you ALWAYS build the **485** from your Visit/Assessment.

This eliminates duplicate data entry and ensures that the information matches on the visit/assessment and the 485.

For a list of 485s that were not created from a Start of Care or Recertification Assessment, go

to **Reports>485>48.01 485s Not Created From Assessment**.
