

I Do Not Have The "Switch Users" Button

If the employee does not have the "**Switch Users**" button on the Barnestorm login screen, please have the appropriate member of staff check the following settings:

- **Codes > Security > Global Settings > Misc > 0520** and **0521**: If needed, make sure they are (both) set to True.
- **Admin > Employee Security >** Pull up that user. Go to **Special Permissions**. Verify if "**Can Switch the Office User Name**" and "**Can Switch the POC UserName**" is highlighted. If not, make the necessary changes and hit **Save Complete Employee Security Profile**.
- Once both the settings are verified and any changes are made, have the user exit the Barnestorm system and reopen the login screen. The "switch users" button should now appear.
