For a list of patient names that were admitted for a specific time frame, use the following report:

- Reports > Patient > 01.06 Selected Patients Detail
- Check the bullet for **Admits**
- Select your date range
- As needed, select the program and payer or leave blank for all
- Select which **Report Content** you want to print (excluding H, K or L)
- Click on **Print**

If you are printing all program and payers then you can also select a different Order (**Order Report By**) to print them by, like by program or payer to divide them out.
Even if the patient was discharged already they will still appear on the report. Report Content 1 Basic Info will include the discharge date.
