

Vendors for Uploading Files to Medicare and Other Payers

Effective June 1, 2014, Barnestorm will no longer be able to transmit and receive files via dial up (Transmit to PGBA). Your agency must sign up with a vendor to connect to Medicare.

Barnestorm has worked with three different vendors for uploading files;

Ability: <http://www.abilitynetwork.com/>

eSolutions: <http://www.ecorpnet.com/>

ZirMed: <http://public.zirmed.com/>

Eligibility check and transmission of claims through ZirMed has been integrated into Barnestorm. That means you can check a patients eligibility with one click of a button and you can transmit claims to ZirMed within Barnestorm Office.

The eligibility of all active Medicare patients can be done in a batch through eSolutions using their MVP service.
