Barnestorm in the Cloud: Web-Based Home Health

Barnestorm's web-based solution is Barnestorm in the Cloud, which gives you all the advantages of a web-based system, including:

- Access from anywhere if you have the Barnestorm app and a valid Barnestorm account.
- Clinicians can sync from anywhere that they can find an internet connection, using our HIPAA-compliant secure system.
- Fully paperless capability with Cloud Docs, which allows you to scan documents into patient records. Clinicians in the field can see signed admission documents, signed orders, and all patient records.
- Savings on IT services such as user accounts, installation, database backups, security.

Barnestorm in the Cloud setup includes:

- Seamlessly transitioning your data and documents to the Cloud.
- Cloud Docs: all your records can be paperless, and clinicians in the field can see signed admission documents, signed orders, and all patient records.
- Ensuring your data storage and transmissions are 100% HIPAA compliant.
- Acquiring and securing an internet presence (domain name) for your business.
- Building a top-of-the-line server customized to the specifications we determine for your number of clinical and office users.
- Setting up hourly snapshot backup of your data in case of catastrophe.
- Setting up local and remote nightly backups of Cloud docs for maximum redundancy.

Ongoing services provided by Barnestorm in the Cloud:

- Manage data access and firewall/security.
- Perform all windows updates and any other software upgrades as needed.
- Perform nightly backups.
- Create/remove users as needed.
- Scale server larger as your business grows.

Hosted Server Info:

64 bit, 4 virtual processors, 15GB memory, dual 40GB SSD drives, optimized for high network performance, HIPAA Compliant. Guaranteed 99% uptime; discount provided when that is not met (subject to proof that the downtime was server issue, not a connection or internet issue).

Internet Speed Minimum Requirement: 20Mbps down and 5Mbps up
