These reports will pull any medications that have a functional class with Antiinfective or Antibiotic in the description.

From Barnestorm Office go to Reports > Patient:

01.44 Pts Antibiotics/Infectives Hx

Pulls patient who were active during the time frame selected. This will include the entire medication history, even if the medication has been discontinued.

01.45 Pts W Antibiotics/Infectives

Pulls patients who were active during the time frame selected. It will only include active medications that have not been discontinued.

Reading the Report

DC Date = Will either show Active or the patient's discharge date from the agency.

Start Date = Is the effective date of the medication entry or it will be the discontinue date of that medication.
