

Plan of Care Status

Barnestorm Office has a screen that will show the status of the patient's current episode that reflects new 2018 CoP Requirements. This is a checklist of the patient's individualized Plan of Care. A green check mark will appear if the requirement has been fulfilled; a red check mark means the item has not been complete.

Each item will either show the data keyed in the system or it will be marked as not found for this period.

If an item is not found, the top section of the screen will tell you where to document the missing piece. Below is a running list of where to find each item.

Individualized Plan of Care for PATIENT, TEST • 888888

Next Step

Go to Patient Histories • Medications

Make sure a medication is entered with a start date on or before 2/14/2018.
