Barnestorm Training Guides "NEW Employees"

We have created several different training guides that can be printed and used as manuals for different departments of your Agency: Office staff, clinical staff and billing staff. Each guide has article links that can be viewed and printed off into your individual manuals or you can create an overall manual of the Barnestorm system. There are also tons of articles, at your fingertips, by going to our Knowledgebase website: kb.barnestorm.biz. All you'll need to do is type in a "search" word and the system will find all articles related to that topic. You have the option to print, bookmark, email or Send as PDF. The Knowledgebase also contains a host of videos for you to view and use as training videos. Here are the Training Guides, feel free to add this page to your Favorites for quicker access. For printable versions use the PRINT MANUAL button that is available on some of the guides. There are also attachments below this article for other print options.

Click a topic to view each guide. (The first topic only contains the PDF. Click the attachment below.)
