

COVID Status

If the patient is found to be a COVID risk, go to Referral > Patient Information > Emergency Plan and check the COVID Risk box. Once the patient status on the Referral is changed to indicate COVID Risk:

- When Barnestorm is maximized, the **Select Patient** screen will show Active COVID Risk patients in hot pink.
- The patient's schedule entry on the **Schedule Calendar** screen will highlight hot pink when the patient is marked as COVID Risk.
- In Point of Care, the **My patients** and **My Schedule** list will show COVID Risk patients in hot pink.

The screenshot shows a patient record interface. At the top right, it says "Admitted: 08/13/2020" and "Active *COVID*" in a pink box. Below this is a navigation bar with tabs: "Patient Information" (selected), "Referral Information", "Payers", "Dr + Pharmacy", "Employees", and "Print". Underneath, there's another set of tabs: "Start", "Contacts", "Emergency Plan" (selected), "Directives", "Directions", "History", and "Notes". In the "Emergency Plan" section, the "COVID Risk" checkbox is checked and highlighted in pink. To the right of this checkbox is a "Print Emergency Plan" button. Below the "COVID Risk" checkbox are several other tabs: "Risk Classification", "Special Needs", "Patient Contacts", "LACE Scoring Tool", and "Other Risk Factors".

COVID Risk marks automatically when a patient phone screening is completed with answers that indicate exposure or possible symptoms. The COVID phone screen article is linked below.

NOTE: If the patient is no longer a COVID risk, you will need to go back to the Referral > Patient Information > Emergency Plan and uncheck the COVID Risk box. Save the referral to make the change.
