From Barnestorm Office > Reports > Agency Data > 06.23 Patient and Visit Counts By Program/Sex/Age

This report will help you to keep track of total visits by patient sex and patient age.

How to Run the Report

- **From and Thru Dates** = Enter your starting search date and ending search date.
- **Program(s) / Payer(s) /Team(s)** = Enter specific program(s), payer(s) and team(s), or leave blank to select all.

After you've made your selections above, click **Print** to review the report. The additional print options include Landscape and Export to Excel.

How to Read the Report

- Program = The program number and name.
- **Sex** = Female or Male
- **Age Range** = The age ranges indicated.
- **Total Visits** = The total visit count within your established From/Thru date.
- **Charge Visits** = The total billable visit count within your established From/Thru date.
- **Unduplicated #Patients** = The total patient count, unduplicated. Regardless of number of admissions, during your selected From/Thru date, the patient will only be counted once.

- Charge Hours = Total billable hour count for the From/Thru date you've selected.
- **$Amount** = The total amount billed within your established From/Thru date

NOTE: If the Sex field has ???, this means there is a patient(s) in the system that does not have the sex field completed in the referral. Please click here on how to search for missing components in the referral: sex, race, date of birth.
